Product Description

XUANWU VTOL tandem wing Take-off weight 15kg

Xuanwu Not only has the VTOL advantage of multi-rotor UAVs, but also has the advantages of long endurance, low noise and inspection of fixed wing UAVs.

Tandem wing structure, optional airfoil, aerodynamic optimization, high lift-to-drag ratio and high efficiency to guarantee flight safety;

Can be equipped with all kinds of navigation system. Applied mixed control technology of four rudder surfaces wherever the UAV can return even if two rudder surfaces are stop working to improve flight safety.

Xuanwu has high efficiency because of the design of small angle sweepback wings and high efficient dynamic system:

No need of lever, the propellers are installed at the top or bottom of the wing to reduce UAV weight and improve the switch efficiency of multi-rotor and fixed wing

High install and recovery efficiency because of the design of quick release and fold structure;

The fuselage is made of carbon fiber composite material which is of light weight high strength, water proof and anti-interference.
