Product Description

24.1x9.6 Inch FLUXER Vertical takeoff and landing drone propellers

Integrated structure design, higher intensity
Optimized VTOL prop profile, smaller prop surface, less air resistance during cruise.
Larger prop pitch, draw more thrust. Faster response and starting up
Increased strength of prop installation positions, higher durability and much safer.
Best combination with MAD brushless motors

Size:**Diameter:** 24.1 inches**Pitch:** 9.6 inches

Material: Typically made from high-strength, lightweight materials such as carbon fiber, reinforced plastic, or advanced composites to ensure durability and performance.

Vertical Takeoff and Landing (VTOL):

Thrust: The larger diameter and higher pitch of these propellers provide significant thrust, essential for efficient vertical takeoff and landing.

Efficiency: Designed to maximize lift during vertical operations, these propellers ensure that the drone can ascend and descend smoothly and efficiently.

Maintenance Tips:

Inspection: Regularly inspect the propellers for signs of damage, such as cracks, chips, or excessive wear.

Cleaning: Keep the propellers clean from debris and dust to maintain their aerodynamic efficiency.

Replacement: Promptly replace any damaged or unbalanced propellers to ensure safe and reliable operation.
