Product Description

14x4.8 Inch FLUXER PRO MATT Matte straight paddle propeller

The propeller blades are straight, meaning they extend directly outward from the propeller hub without any curve or angle. This design is chosen for its efficiency in generating thrust and stability during flight. Matte finish reduces reflections and glare, which can be beneficial for aerial photography and videography. It helps minimize light distortions and ensures a more consistent image quality.

Matte straight propellers are designed to provide efficient thrust and control. They are optimized to reduce noise and vibrations, contributing to smoother flights and longer flight times.
