Product Description

26.2X8.5IN Glossy Carbon fiber folding propeller FLUXER Pro

FLUXER 26.2X8.5"propeller is a multi-rotor folding propeller made of high-quality carbon fiber, with swept-back winglets on both sides of the propeller tip, which effectively reduces centrifugal pull during operation. The middle part is connected by the paddle clamp, which is retractable and small volume. So it is convenient for storage and transportation. With the advantages of reliability, high rigidity and light weight, it has bigger static tension than ordinary propellers at the same power, which can increase the endurance. Aerodynamic design makes significant improvements in energy loss, noise, impact resistance and flight. With MAD brushless motor magnetic circuit design, the power system has advantages in tension and efficiency.
