### Payload capacity (30L) :

Equipped with a 30-liter fuel tank, the drone can cover a large area in a single flight, greatly reducing the need for frequent refueling.

It is ideal for large farms and allows for wider spray coverage in less time, resulting in greater operational efficiency.

### Electric Power (EV) :

The HV series features high-capacity lithium-ion batteries that provide quiet, environmentally friendly performance.

The flight time is usually between 20 and 30 minutes, depending on the payload and environmental conditions.

The replaceable battery pack allows for quick replacement for continuous operation throughout the day.

### Precision spraying System:

The HV series is equipped with advanced multi-nozzle spraying technology to ensure uniform and precise application of pesticides, herbicides and fertilizers.

The adjustable flow rate can be tailored to the needs and chemical type of a particular crop, optimising treatment results.

Anti-drift technology minimizes chemical drift, ensuring targeted application and reducing environmental impact.
