Product Description

Multicopter drone toray 3K carbon fiber fit blade 22-24 inches

Toray 3K carbon fiber

Lightweight and robust: Toray 3K carbon fiber is known for its high strength to weight ratio, making it ideal for drones that need to carry heavy payloads while still maintaining flexibility and efficiency in flight.

Durability: 3K refers to the number of filaments in each bundle (3,000 fibers). This provides a good balance between flexibility and rigidity, ensuring that the drone can withstand the stress of carrying heavy loads and maneuvering at high speeds.

Heat resistance: Carbon fiber also has good resistance to high temperatures, which is very beneficial for long-haul flights with high-power engines.

Application:

1. Law enforcement forensics
2. Security patrols
3. Traffic control
4. Infrared inspection
5. Film and television shooting
6. Water survey
7. Flood control command
8. Oil and gas field inspection
9. Surveying and mapping of construction projects
10. Wildlife detection
11. Forest fire detection
12. Production safety testing
