Product Description

Tethered uav Injection system Use a six-rotor tethered jet system

The tethered jet system SF-90X-100M is mainly composed of tethered power supply system, integrated water pump system (exclusive) and large payload UAV. It is mainly applied to the curtain wall cleaning and spraying market, replacing the "spider man", and improving the efficiency and safety of the facade maintenance of urban tall buildings, power plants and chemical plants. The innovation of the tethered system greatly improves the endurance of the traditional water system, effectively solving the infinite endurance of the last 100m. Weize mooring can provide mooring power supply system solutions for large load water system cleaning platform, height from 50m to 300m, power from 18kw to 60kw, which can meet different customer needs.
