## Product Description

### Drone Camera 3000m laser range finder High performance four-sensor gimbal

#### Description

DIT30E integrated PTZ system can be widely used in public security emergency, fire rescue, power line inspection, field search and other industries. The system integrates optical zoom, video recording and photo taking, PTZ stabilization and control as one. It is very simple for customers to connect the gimbal camera. After installing and fixing the airborne side to drones or other UAVs, connect the image transmission, and then power on the gimbal camera, the system can start working. The ground control software can directly control and display the picture-in-picture video through the network in real time, and realize functions such as zooming, focusing, taking pictures and videos, and PTZ control through buttons or the mouse.
